NOTICE OF WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specific conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

This institution reserves the right to refuse to accept a copying order if, in its judgment, fulfillment of the order would involve violation of copyright law.

E&MJ
ENGINEERING AND MINING JOURNAL

DECEMBER 2013 • VOL 214 • NUMBER 12

OSM Library
JAN 0 8 2014
Denver, Colorado

FEATURES

Teaching Tire Awareness
Properly trained techs service tires safely 48

A Good Air Flow
As mines become deeper and hotter with more diesel-engine vehicles in use, ventilation systems need careful design and tuning. E&MJ looks at some of the opportunities—and the critical need for a responsible approach to fresh air supply. 60

Didipio: A Philippines Success Story
After commissioning in April 2013, the gold-copper operation quickly achieved commercial production rates three months later 72

Scaling-up Shaft Safety
New shaft inspection services and technology offer the prospect of quicker—but more effective—underground checks, with less risk to personnel 80

Turkey's Mining Industry Comes of Age
Already Europe's largest gold producer, its miners are targeting $15 billion in mineral exports by 2023—more than triple the current level 86

Return on Sustainability: Workforce Housing for People, Plant and Profit
Well-organized workforce housing can be a valuable partner for companies pursuing their sustainable development goals, as well as a component of long-term profitability 88

Pressurizing with Dust Collectors
Guidelines on how to apply a concept that is appropriate for mine and plant environments, where dust generated during crushing, screening, and conveying must be controlled to protect workers, office spaces and sensitive equipment 92

New Blasting Technologies Challenge Customary Practices
Alternatives to conventional explosives and traditional loading methods offer the prospect of better blasting results in both surface and underground applications 96

Best Practices for Bearing Protection
A simple method now allows VFD-induced electrical bearing damage to be prevented—not just repaired 99

Energy and Cost Comparisons of HPGR-based Circuits
UBC researchers compare the cost of novel comminution techniques with the Huckleberry mill's existing circuit 102

Special Report: British Columbia's Mining Industry & Vancouver, the World's Mining Barometer
In spite of adverse economic conditions, mining in British Columbia stands in great stead for growth, while Vancouver's myriad of mining companies continue to operate in all corners of the world 113

LEADING DEVELOPMENTS

Nyrstar Investing to Increase its Smelting Returns 4
Cliffs Shelves its Fire Chromite Project 5
Bingham Canyon Beats Timetable to Open-pit Access After April Slope Failure 5
Vale Sells its 22% Interest in Norsk Hydro 6

AROUND THE WORLD

U.S. & Canada: *Fort Hills Oil Sands Project Gets Go-ahead* 10
Latin America: *Barrick Halts Pascua-Lama Construction* 20
Australia/Oceania: *PanAust Buying Glencore Xstrata's Frieda River Interest* 24
Africa: *Ivanhoe Planning Two-phased Development for Kamoa* 28
Asia: *Alacer Plans Development of Çöpler Sulphides* 32
Exploration Roundup: *Seabridge Seeing Major Copper Potential* 36

This month E&MJ offers several ideas to help mining engineers and metallurgists make wise decisions; they range from tire programs on the surface to ventilation strategies underground to economical grinding in the mill. On the cover, tire technicians prepare to change a tire on a Komatsu 830E haul truck at Teck's Greenhills operations near Sparwood, B.C.

Featured Series: Korean Hydrology

Assessment of Future Climate Change Impact on Water Quality of Chungju Lake, South Korea, Using WASP Coupled with SWAT
– *Jong Y. Park, Geun A. Park, and Seong J. Kim* 1225

Additional Technical Papers

Coastal Flood Inundation Monitoring with Satellite C-band and L-band Synthetic Aperture Radar Data
– *Elijah Ramsey III, Amina Rangoonwala, and Terri Bannister* 1239

Assessing the Impacts of *E. coli* Laden Streambed Sediment on *E. coli* Loads over a Range of Flows and Sediment Characteristics
– *Pramod K. Pandey and Michelle L. Soupir* 1261

A Comparison of DEM-Based Indexes for Targeting the Placement of Vegetative Buffers in Agricultural Watersheds
– *Michael G. Dosskey, Zeyuan Qiu, and Yang Kang* 1270

Curve Number Derivation for Watersheds Draining Two Headwater Streams in Lower Coastal Plain South Carolina, USA
– *Thomas H. Epps, Daniel R. Hitchcock, Anand D. Jayakaran, Drake R. Loflin, Thomas M. Williams, and Devendra M. Amatya* 1284

Evaluation of Operational National Weather Service Gridded Flash Flood Guidance over the Arkansas Red River Basin
– *Dugwon Seo, Tarendra Lakhankar, Juan Mejia, Brian Cosgrove, and Reza Khanbilvardi* 1296

Streamflow Responses to Climate Change: Analysis of Hydrologic Indicators in a New York City Water Supply Watershed
– *Soni M. Pradhanang, Rajith Mukundan, Elliot M. Schneiderman, Mark S. Zion, Aavudai Anandhi, Donald C. Pierson, Allan Frei, Zachary M. Easton, Daniel Fuka, and Tammo S. Steenhuis* 1308

A System Dynamics Model for Conjunctive Management of Water Resources in the Snake River Basin
– *David J. Hoekema and Venkataramana Sridhar* 1327

Using Paleo Reconstructions to Improve Streamflow Forecast Lead Time in the Western United States
– *Christopher Carrier, Ajay Kalra, and Sajjad Ahmad* 1351

A Two-Decade Watershed Approach to Stream Restoration Log Jam Design and Stream Recovery Monitoring: Finney Creek, Washington
– *Roger A. Nichols and Gary L. Ketcheson* 1367

Characterization of Drought in the South Atlantic, United States
– *Lauren A. Patterson, Brian D. Lutz, and Martin W. Doyle* 1385

Characterizing Rainwater Harvesting Performance and Demonstrating Stormwater Management Benefits in the Humid Southeast USA
– *K.M. DeBusk, W.F. Hunt, and J.D. Wright* 1398

Estimating Suspended Solids from Turbidity in the Robeson Creek, NC Watershed
– *D.E. Line, K.R. Hall, and J.D. Blackwell* 1412

Flood Forecasting Using Neural Computing Techniques and Conceptual Class Segregation
– *Sungwon Kim and Vijay P. Singh* 1421

Runoff Curve Numbers at the Agricultural Field-Scale and Implications for Continuous Simulation Modeling
– *Paul M. McGinley, Adam T. Freihoefer, and Randy S. Mentz* 1436

Modeling Hydrologic Benefits of Low Impact Development: A Distributed Hydrologic Model of the Woodlands, Texas
– *George Doubleday, Antonia Sebastian, Tatyana Luttenschlager, and Philip B. Bedient* 1444

A Method to Consider Whether Dams Mitigate Climate Change Effects on Stream Temperatures
– *Sarah E. Null, Scott T. Ligare, and Joshua H. Viers* 1456

A Decade of Geomorphic and Hydraulic Response to the La Valle Dam Project, Baraboo River, Wisconsin
– *Samantha L. Greene, Austin Jena Krause, and James C. Knox* 1473

TECHNICAL NOTE

Do Polynomials Adequately Describe the Hypsometry of Monadnock Phase Watersheds?
– *James A. Vanderwaal and Herbert Ssegane* 1485

THE MAGAZINE OF NATURAL RESOURCE MANAGEMENT AND RESTORATION

Volume 57, Number 6 November/December 2013

ABOUT THE COVER

This scenic pond sits nestled in the Catskills of upstate New York. Designed by fisheries professor, Mark Cornwell, it's home to a variety of fish and recreational enjoyment of family and friends. Photo courtesy of Mark Cornwell. See story page 26 where Bob Lusk shares his ideas of how you can use the frigid effects of winter in your pond's favor.

FEATURES

LOW IMPACT DEVELOPMENT

8 **Managing the Tension - How Not Solving Some Problems Can Lead to the Best Results**
Historic Amtrak train station parking area utilizes robust stormwater management controls to reduce both volume and peak rate, and contribute to the environment through groundwater recharge and the use of native landscaping and vegetation.
by Benjamin S. Craddock

SHORELINE PROTECTION

14 **Oceanfront Community Finds Solution to Three Sources of Erosion**
Coastal erosion from the combined water sources of Sutton Creek, the Pacific Ocean and "Piping" were eroding the bluff by several feet per day and threatening homes and private property.
by Gregory Palmer

GEOSYNTHETICS

20 **Spray-Applied Geomembranes Have a Big Impact on Low Impact Development**
The Water Quality LID Demonstration in Centennial, CO efficiently incorporates a range of green technologies, including bio-mod units, tree filters, living wall, bioswale, and SEMSWA raingarden to form a "treatment train".
by Patrick Elliott

PONDS & LAKES

26 **Winter - Your Pond's Ally?**
How you can use the frigid effects of winter in your pond's favor with options like thoughtful aeration, drawdown for unwanted plants and habitat improvement.
by Bob Lusk

BEST MANAGEMENT PRACTICES

30 **Rocklin Crossing and Commons Projects, Bright Future from a Contractor's Innovation**
Building the city of Rocklin's largest retail complex meant controlling runoff, erosion and sedimentation, in order to meet CEQA guidelines.
by Chris A. Moir

STORMWATER MANAGEMENT

36 **Impaired Urban Waters & TMDLs: Stormwater Volume Controls Work!**
In a world of ever-growing networks of impervious surface-based superhighways, roads, parking lots, and alleyways, stormwater volume controls are commonly used tools in the TMDL toolkit.
by Bruce Wilson, Joy Michels & Rebecca Kauten

SLOPE STABILIZATION

42 **How Do You Know? Polyacrylamide Usage 101**
Not only is polyacrylamide (PAM) used for erosion control, with its ability to resist wind and water forces, but it also enhances the filtration of water into the soil.
by Robert C. Fischbach

STORMWATER MANAGEMENT

46 **Setting a Precedent for Stormwater Management, Water Reuse and Sustainability**
When it rains in Southern California, it is often sudden and forceful. This was crucial while designing new apartments that would have the ability to reuse rainwater and be self-sustaining.
by Yi-Ai Liu

EROSION CONTROL

52 **Fiber Matrix Shows Success in Winter Erosion Control**
Shell Appalachia needed to stabilize a recently constructed well pad through winter snows and spring thaw, while preventing seed and amendments from being washed off the slopes during the winter season.
by Scott Harrison

EDUCATION

54 **Great Connections 2014: Gets to the Heart of Erosion and Sediment Control and Stormwater Management**
A new conference and workshop organized by the Great Lakes and Great Rivers Chapters of the International Erosion Control Association (IECA) will take place in April 2014, focusing on environmental compliance, active and post-construction stormwater management, as well as local-driven policy and education initiatives.

2014 BUYER'S GUIDE

57 **Buyer's Guide**
Land and Water presents its twenty-second Buyer's Guide, the most comprehensive erosion control and water management product directory in the industry of natural resource management. Company listings are on page 57 and classifications begin on page 72. Companies shown in **bold** or with a logo are advertisers in this issue.

In This Issue

Surface mining technology takes the form of trucks and loaders, in-pit-crushing conveying and autonomous haulage equipment. All of this involves more sophisticated ways to manage material movement, page 36. Energy is one of the biggest costs in a mining operation. Managing energy use can provide mines opportunities for improved efficiencies and lower costs, page 41. China has large amounts of rare earth minerals. Jerry Tien looks at China's reserves of these minerals on page 44.
