NOTICE OF WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specific conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

This institution reserves the right to refuse to accept a copying order if, in its judgment, fulfillment of the order would involve violation of copyright law.

THE MAGAZINE OF NATURAL RESOURCE MANAGEMENT

Volume 58, Number 6 November/December 2014

DEPARTMENTS

6 Tell It Like It Is
76 Advertiser's Index
77 Equip-Board

ABOUT THE COVER

A pond buffer using native plantings located in Commons Park, Shoreview, MN. The strong focus on native plants brought in a wealth of wildlife—great spangled fritillary butterflies, tree frogs, bumble bees and many birds. Photo Credit: Mark Maloney, Director of Public Works, City of Shoreview (L&W's reader submitted photo).

FEATURES

PONDS & LAKES
(THIS ISSUE'S 40TH FOCUS)

8 **40 Years of Pond History**
40 years ago most ponds were designed to provide water for live stock and occasional fishing. As family farms changed and baby boomers moved back from the city, ponds were being built for recreation, to attract wildlife, hatchery ponds, even geothermal energy.
by Bob Lusk

GEOSYNTHETIC CLAY LINERS

12 **Changing Designs with Geosynthetic Clay Liners**
Two recent GCL conferences highlighted two main points in the industry: the use and acceptance of GCLs in engineering has broadened substantially, and manufacturing and design advances have enabled GCLs to be for more application and site specific now.
by Chris Kelsey

WATER QUALITY

17 **Removing Dams; Restoring Rivers**
The Scioto Greenways project is a plan to remove the Main Street Lowhead Dam, restore a downtown segment of the Scioto River and add approximately 33 acres of new, public recreational green space along the river corridor.
by Bryan Kingley, PE

SEDIMENT CONTROL BMPS

22 **Independent, Full-Scale Evaluation of Erosion and Sediment Control BMPs**
AASHTO's National Transportation Product Evaluation Program large-scale testing protocols continue to beneficially impact the field, including through new sediment retention device testing protocols. Agencies may use this information to determine a product's acceptability for their approved products list and for related projects.
by C. Joel Sprague, Peter Kemp & Katheryn Malusky

SHORELINE RESTORATION

30 **Armoring Slope Presents Challenges**
An old concrete bridge abutment was removed which left a quickly eroding unprotected slope along the waterway. A permanent stabilization measure was needed for a 3,000 sq. ft. section.
by Richard Pilston

LOW IMPACT DEVELOPMENT

34 **LID Blended with Ecology on an Urban College Campus**
The use of ecological LID principles enabled Western Technical College to avoid infrastructure costs and obtain quicker and smoother approval under the city's MS4 water quality discharge permit.
by Kim Alva Chapman

GEOMEMBRANES

40 **Enhanced Barrier System Contains Fuels and Solvents for Recycling Site**
When a new auto shredder operation was proposed new New Carlisle, IN, the operators took an extra step to secure permitting and assure locals of the environmental protection measures at the site by installing a secondary containment geomembrane barrier beneath a hardscape pad.
by Chris Kelsey & Gary Kolbasuk

INDUSTRY ACRONYMS

45 **Life in the Time of Acronyms**
Today, we live in a world of shortcuts: everyone demands almost instantaneous communication and satisfaction. Acronyms are just attempts by humans to hurry-up communication, but that doesn't mean that everyone understands what they mean.
by Mike Harding, CPESC, CESSWI, QSD, QSP, ToR, HEP, EW, SC, MAT, FE, HH, TRE, LIMITW

PONDS & LAKES

50 **Building Jim Swanson's Lake**
In the second of a three-part series, a recent 60-acre land purchase in north Texas inspires a 10-15 acre lake building project. The owner enlists the help of a veteran fisheries biologist, along with a 40-year professional earthmover.
by Bob Lusk & Mike Otto

2015 BUYER'S GUIDE

57 **Buyer's Guide**
Land and Water presents its twenty-third Buyer's Guide, the most comprehensive erosion control and water management product directory in the industry of natural resource management. Company listings begin on page 57 and classifications begin on page 72. Companies shown in **bold** or with a logo are advertisers in this issue.
