- 1) The (g) (5) account is calculated by subtracting the Minimum Program Contribution of applicable States/Tribes from their respective "Federal Share Before Minimum Program" Distribution.
- 2) The (g) (3) account is comprised of the "Minimum Program Need" identified for applicable States/Tribes plus respective Emergency Program Funding and ACSI Funding.
- 3) The 10% Set-Aside limit under 402(g)(6) for post-September 30, 1995 purposes and acid mine drainage (AMD) abatement and treatment are calculated based on the sum of (g)(1) and (g)(5) columns above. The combination of Future and AMD set-aside amounts cannot surpass this cap. Based upon appropriation language however, Maryland's set-aside limitation is the greater of \$1,000,000 or 10% of the sum of (g)(1) and (g)(5) columns above.
- 4) The 30% limit for water projects under 403(b) is calculated based on the sum of (g)(1) and (g)(5) columns above.
