

FEDERAL REGISTER: 46 FR 32826 (June 24, 1981)

DEPARTMENT OF THE INTERIOR

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM)

Office of Surface Mining Reclamation and Enforcement

List of Laboratories Qualified To Perform Work under the Small Operator Assistance Program

ACTION: Update and correction notice of laboratories qualified to perform work under the Small Operator Assistance Program.

SUMMARY: OSM is informing the public and State regulatory authorities of laboratories that have been qualified as of March 1981, for work under the Small Operator Assistance Program (SOAP). During the interim and under permanent regulatory programs, qualified laboratories will provide the *determination* of probable hydrologic consequences and *statement* of the results of test borings for eligible small operators. The *determination* and *statement* are two important permit application requirements. This notice is published pursuant to 30 CFR 795.17(a)(2).

FOR FURTHER INFORMATION CONTACT: Further information can be obtained by contacting the following people:

Headquarters: Donald W. Willen, Department of Interior, Office of Surface Mining, 1951 Constitution Avenue NW., Rm 5215L, Washington, D.C. 20240, (202) 343-9104.

Region I: Keith Eggleston, Office of Surface Mining, 603 Morris Street, Charleston, West Virginia 25301, (304) 342-8125.

Region II: Charles Ferst, Office of Surface Mining, Farragut Building, 530 Gay Street SW., Knoxville, Tennessee 37902, (615) 971-5100.

Region III: Leroy Davis, Office of Surface Mining, Federal Building & Court House, 46 East Ohio Street, Indianapolis, Indiana 46204, (317) 269-2632.

Region IV: Ronald Schwartz, Office of Surface Mining, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 6106, (816) 374-3920.

Region V: Charles Harrison, Office of Surface Mining, Brooks Towers, 1020 15th Street, Denver, Colorado 80202, (303) 837-5966.

SUPPLEMENTAL INFORMATION:

The laboratories listed below were qualified by OSM or State regulatory authorities as of March 1981 for work under the Small Operator Assistance Program (SOAP). This list updates and corrects the earlier list of qualified laboratories published in the Federal Register on January 23, 1981. The *determination* of probable hydrologic consequences of proposed mining and reclamation operations and *statement* of the results of test borings or core samplings are provided to eligible small operators under the SOAP. As defined in 30 CFR 795.17(a)(1), qualified laboratory is "a designated public agency, private consulting firm, institution, or analytical laboratory which can provide the *determination* or *statement* under this Program."

To qualify for work under the SOAP, laboratories have to satisfy conditions of personnel, experience, organization and facilities, and other criteria as set forth in 30 CFR 795.17(b). The laboratory qualification procedures consist of two phases: (1) Completion of an application form provided by the Office, and (2) an on-site inspection of laboratory personnel and facilities by the Office.

Two basic qualification categories are: 1. Prime contractors (for *determination* and/or *statement*) and; 2 subcontractors (for water quality and/or overburden and coal analysis). The prime contractors are qualified to provide hydrologic and geologic data collection and interpretative reports, and must be able to provide most of the services in-house. The subcontractors are qualified to provide analytical services to the prime contractors. Inhouse services must be provided by personnel employed full-time by the specific office of the laboratory requesting qualification. However, some services may be provided to the prime contractor by individual consultants (specialists) if their use has been approved by OSM during the qualification process. Lists of consultants will not be published in the Federal Register. Small business, women owned, minority owned, and certified 8(a) laboratories are indicated in the list.

The list of qualified laboratories will be published periodically in the Federal Register. Becoming qualified or being listed in the Federal Register does not guarantee contracts for work in the SOAP. Under procedures for Federal administration of the SOAP, contracts will be awarded to successful offerors to Request for Proposal (RFP) solicitations. RFPs will be issued

periodically as the need arises. Qualified laboratories may compete for work in States other than those States in which they are located. States that administer the SOAP under interim or permanent regulatory programs may use this list of qualified laboratories, may use similar procurement procedures, and also may qualify laboratories.

Laboratories may be disqualified and dropped from the list of qualified laboratories for inadequate performance in contracts, conflicts of interest, or for changes in personnel, facilities or organization that cause the laboratory to no longer meet the requirements set forth in 30 CFR 795.17(b).

All laboratories will be qualified periodically.

Dated: June 17, 1981.

Andrew W. Bailey,

Acting Director, Office of Surface Mining Reclamation and Enforcement .

LIST OF QUALIFIED LABORATORIES

Type of Contractor

P=prime contractor

S=subcontractor

Qualification Category

D=field data collection, water quality analyses, data compilation and interpretation, and report writing to produce a *determination* of the probable hydrologic consequences of mining and reclamation operations

D1=same as above except that water quality analyses will be subcontracted

S=field data collection, overburden and coal analyses, data compilation and interpretation, and report writing to produce a *statement* of the results of test borings or core samplings

S1=same as above except that overburden and coal analyses will be subcontracted

W=water quality analyses

O=overburden and coal analyses

Classes of Business

1=small business under the Engineering Services size standards

2=woman-owned business

3=minority owned as defined in Public Law 95-507

4=certified 8(a) by the Small Business Administration

Qualifying Agency

Laboratories qualified by State regulatory authorities are identified by a letter in front of laboratory name. All other laboratories were qualified by OSM.

a=qualified by Ohio Department of Natural Resources.

BILLING CODE 4310-05-M

{32846} [FR Doc. 81-18598 Filed 6-23-81 8:45 am]

{32846} BILLING CODE 4310-05-C

TYPE: Federal Register

TITLE: DEPARTMENT OF THE INTERIOR Office of Surface Mining Reclamation and Enforcement List of Laboratories Qualified To Perform Work Under the Small Operator Assistance Program

CITE: 46 Fed. Reg. 7856-7875

DATE: January 23, 1981

AGENCY: AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), U.S. Department of the Interior.

ACTION: ACTION: Notice of laboratories qualified to perform work under the Small Operator Assistance Program.

SUMMARY: SUMMARY: OSM is informing the public and State regulatory authorities of laboratories that have been qualified as of November 1980, for work under the Small Operator Assistance Program (SOAP). During the interim and under permanent regulatory programs, qualified laboratories will provide the *determination* of probable hydrologic consequences and *statement* of the results of test borings for eligible small operators. The *determination* and *statement* are two important permit application requirements.

This notice is published pursuant to 30 CFR **795.17(a)(2)**.

SUPP-INFO: {7856} FOR FURTHER INFORMATION CONTACT: Further information can be obtained by contacting the following people:

{7856} Headquarters: Donald W. Willen, Department of Interior, Office of Surface Mining, 1951 Constitution Avenue NW, Room 5215L, Washington, DC 20240 (202) 343-9104.

{7856} Region I: Keith Eggleston, Office of Surface Mining, 603 Morris Street, Charleston, West Virginia 25301 (304) 342-8125, Ext. 290.

{7856} Region II: Charles Ferst, Office of Surface Mining, Farragut Building, 530 Gay Street SW, Knoxville, Tennessee 37902 (615) 637-8060.

{7856} Region III: Leroy Davis, Office of Surface Mining, Federal Building & Court House, 46 East Ohio Street, Indianapolis, Indiana 46204 (317) 269-2632.

{7856} Region IV: Ronald Schwartz, Office of Surface Mining, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106 (816) 374-3920.

{7856} Region V: Charles Harrison, Office of Surface Mining, Brooks Towers, 1020 15th Street, Denver, Colorado 80202 (303) 837-5966.

{7856} SUPPLEMENTARY INFORMATION: The laboratories listed below were qualified by OSM or State regulatory authorities as of November 1980, for work under the Small Operator Assistance Program (SOAP). This list updates the earlier list of qualified laboratories published in the Federal Register on February 19, 1980. The *determination* on February 19, 1980. The *determination* of probable hydrologic consequences of proposed mining and reclamation operations and *statement* of the results of test borings or core samplings are provided to eligible small operators under the SOAP. As defined in 30 CFR **795.17(a)(1)**, qualified laboratory is "a designated public agency, private consulting firm, institution, or analytical laboratory which can provide the *determination* or *statement* under this Program."

46 Fed. Reg. 7856-7875 January 23, 1981

{7856} To qualify for work under the SOAP, laboratories have to satisfy conditions of personnel, experience, organization and facilities, and other criteria as set forth in 30 CFR **795.17(b)**. The laboratory qualification process consists of two phases: 1. completion of an application form provided by the Office, and 2. an on-site inspection of laboratory personnel and facilities by the Office.

{7856} Two basic qualification categories are: 1. prime contractors (for *determination* and/or *statement*) and; 2. subcontractors (for water quality and/or overburden and coal analysis). The prime contractors are qualified to provide hydrologic and geologic data collection and interpretative reports, and must be able to provide most of the service in-house. The subcontractors are qualified to provide analytical services to the prime contractors. In-house services must be provided by personnel employed full-time by the specific office of the laboratory requesting qualification. However, some services may be provided to the prime contractor by individual consultants (specialists) if their use has been approved by OSM during the qualification process. Lists of consultants will not be published in the Federal Register. Small business, women owned, minority owned, and certified 8(a) laboratories are indicated in the list.

{7856} The list of qualified laboratories will be published periodically in the Federal Register. Becoming qualified or being listed in the Federal Register does not guarantee contracts for work in the SOAP. Under procedures for Federal administration of the SOAP, contracts will be awarded to successful offerors to Request for Proposal (RFP) solicitations. RFPs will be issued periodically as the need arises. Qualified laboratories may compete for work in States other than those States in which they are located. States that administer the SOAP under interim or permanent regulatory programs may use this list of qualified laboratories, may use similar procurement procedures, and also may qualify laboratories.

{7856} Laboratories may be disqualified and dropped from the list of qualified laboratories for inadequate performance in contracts, conflicts of interest, or for changes in personnel, facilities or organization that cause the laboratory to no longer meet the requirements set forth in 30 CFR **795.17(b)**.

{7856} All laboratories will be requalified periodically.

{7856} Dated: January 16, 1981.

{7856} Paul L. Reeves,

{7856} *Acting Director, Office of Surface Mining Reclamation and Enforcement.*

SEG-TEXT-1: {7856} List of Qualified Laboratories

{7856} Type of Contractor:

{7856} P = prime contractor

{7856} S = subcontractor Qualification Category:

{7856} D = field data collection, water quality analyses, data compilation and interpretation, and report writing to produce a *determination* of the probable hydrologic consequences of mining and reclamation operations

{7856} D' = same as above except that water quality analyses will be subcontracted

{7856} S = field data collection, overburden and coal analyses, data compilation and interpretation, and report writing to produce a *statement* of the results of test borings or core samplings

{7856} S' = same as above except that overburden and coal analyses will be subcontracted

{7856} W = water quality analyses

{7856} O = overburden and coal analyses Classes of Business:

{7856} 1 = small business under the Engineering Services size standards

{7856} 2 = woman-owned business

46 Fed. Reg. 7856-7875 January 23, 1981

{7856} 3 = minority owned as defined in Public Law 95-507

{7856} 4 = certified 8(a) by the Small Business Administration Qualifying Agency:

{7856} Laboratories qualified by State regulatory authorities are identified by letter in front of laboratory name. All other laboratories were qualified by OSM.

{7856} a = qualified by Ohio Department of Natural Resources.

{7856} BILLING CODE 4310-05-M

{7857} OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT LIST OF LABORATORIES QUALIFIED TO PERFORM WORK UNDER THE SMALL OPERATOR ASSISTANCE PROGRAM

{7857}
