**Current Status:**

- The team noted that Paul Rothman would be retiring, and Richard Wahrer will be his replacement on both the ARTT and the NTTT.
- Mike Richmond presented the spreadsheet submittal of Potential Applied Science Projects from the ARTT/MCR via GotoMeeting. The WR provided scores, but did not actually rank the proposals. The team ranked the proposals for the WR using the scores.
- Discussion was held on the top 9 proposals, as consistently ranked by the regions, and the team agreed that all 9 should be in the top 12. The team discussion resulted in a consensus Top 12, of which 6 may be funded. If additional funds do become available, the team agreed that the bottom 6 could be funded; again, if additional monies become available at some future time.
- Information will be passed onto the Executive Council.

The next scheduled call will be March 16, 2016 at 3PM Eastern time.
