Significant updates in bold italics

The team discussed the selection of a State technical representative for the **Applied Science Review and Selection Process** to represent the Mid-Continent States. The results were that **Marlene Spence** from the Kansas program was unanimously approved to be the MCR state representative.

Larry Lewis and the team discussed the results of the **AMD workshop** in Arkansas and made suggestions for improvements for the next workshop in Indiana. We need to organize the event to facilitate discussion more. We need to organize the field trip around the use of a bus or vans to avoid an excessively long caravan of cars. Overall the team agrees that the AMD workshops are great benefit to the states and should be continued.
