New Mexico AML Program Receives Top Honors in 2017 Abandoned Mine Land Reclamation Awards

Bureau to Honor Five States at 25th AML Reclamation Awards Presentation

Washington, DC – The Federal bureau that regulates coal mining and aids in restoring abandoned mine lands is honoring a New Mexico environmental agency with its highest national award for abandoned mine reclamation.

The Office of Surface Mining Reclamation and Enforcement (OSMRE) will honor the New Mexico Mining and Minerals Division (NMMMD) AML Program during a national gathering of mine land reclamation professionals. NMMMD won the Abandoned Mine Land Reclamation Western Regional Award for a project that addressed uncontrolled stormwater runoff that affected an entire small town.

OSMRE, through its Abandoned Mine Land (AML) Reclamation Program, addresses the hazards and environmental degradation created by the two centuries of U.S. coal mining that occurred before the signing of the Surface Mining Control and Reclamation Act of 1977. This will be OSMRE’s 25th year of honoring exemplary state and tribal reclamation projects.

New Mexico’s Low Impact Stormwater Project, Madrid, brought together diverse groups living and working in a small historic coal town to address bare, high sediment producing gob piles from mining dating back more than 180 years. During intense storms, heavy sediment running from the piles impacted homes, businesses, and state roads.

In FY 2017, New Mexico received $2.8 million in AML funding from OSMRE.

New Mexico is among five winners of the 2017 Abandoned Mine Land Reclamation Awards for their reclamation excellence. A panel of judges composed of directors of state and tribal reclamation programs and OSMRE managers voted to determine this year’s awardees.
The other 25th anniversary award winners are:

**National Award**
Pennsylvania Department of Environmental Protection
Division of Abandoned Mine Lands
*Huling Branch AML Reclamation/ATV Recreation and Watershed Improvement Project*

**Regional Awards – Honor the best projects in OSMRE’s three regions**

**Appalachian Regional Award**
Kentucky Department for Natural Resources
Division of Abandoned Mine Lands
*Bell Central School HP AML Reclamation Project*

**Mid-Continent Region Award**
Indiana Department of Natural Resources
Division of Reclamation AML Program
*Sugar Ridge Fish and Wildlife Area 2 Project*

**Small Project Award**
(The Small Project Award recognizes a project that cost less than $1 million and is in a state that receives less than $6 million in AML funds.)
Virginia Department of Mines, Minerals and Energy
Division of Mined Land Reclamation
*Hurricane Fork Gob Pile Project*

Previous award winning projects have featured innovative reforestation techniques; geomorphic land restoration; and the creation of recreation space and wetlands to mitigate acid mine drainage.

OSMRE will present its Abandoned Mine Land Reclamation Awards during the 39th annual conference of the National Association of Abandoned Mine Land Programs in Lexington, Kentucky on September 25, 2017.

The Office of Surface Mining Reclamation and Enforcement (OSMRE) carries out the requirements of the Surface Mining Control and Reclamation Act of 1977 in cooperation with states and tribes. OSMRE’s objectives are to ensure that coal mining activities are conducted in a manner that protects citizens and the environment during mining, to ensure that the land is restored to beneficial use after mining, and to mitigate the effects of past mining by aggressively pursuing reclamation of abandoned coal mines.
