

PUBLIC NOTICE  
Bull Mountains Mine No.1  
Federal Mining Plan Modification  
Environmental Assessment  
Unsigned Finding of No Significant Impact

The U.S. Department of the Interior, Office of Surface Mining Reclamation and Enforcement (OSMRE), Western Region Office, has prepared an Environmental Assessment (EA) and unsigned Finding of No Significant Impact (FONSI) for Signal Peak Energy, LLC's Bull Mountains Mine No. 1, Amendment 3 mining plan modification for Federal coal lease MTM 97988.

OSMRE prepared an EA in 2018 to address the August 14, 2017, ruling by the Court and to satisfy OSMRE's responsibilities under National Environmental Policy Act of 1969 (NEPA). OSMRE signed a FONSI on May 21, 2018. OSMRE prepared a MPDD, and the ASLM approved the mining plan modification on August 3, 2018. On March 9, 2020, the Court identified a deficiency in OSMRE's 2018 NEPA analysis, vacated and set aside the 2018 EA, and remanded the matter back to OSMRE for further action (see *350 Montana v. Bernhardt* Case 9:19-cv-00012-DWM, 2020 WL 1139674 [D. Mont. Mar. 9, 2020]). This EA was prepared to address the 2020 Court ruling and satisfy OSMRE's responsibilities under NEPA.

Signal Peak Energy, LLC (SPE) owns and operates the Bull Mountains Mine No. 1. The mine is located in Musselshell and Yellowstone counties between the Musselshell and Yellowstone rivers, approximately 30 miles north of Billings and 20 miles southeast of Roundup, Montana.

The OSMRE is responsible for reviewing plans to conduct coal mining and reclamation operations on lands containing leased Federal coal. Pursuant to 30 CFR 746, the OSMRE must prepare and submit to the Secretary of the Interior a mining plan decision document recommending approval, disapproval, or approval with condition(s) of the proposed mining plan modification. OSMRE is announcing that the EA and an unsigned FONSI are available online and is requesting public comments on the documents.

The proposed mining plan modification would allow Signal Peak to continue underground coal mining, within the permit area, on a total of approximately 1,835 acres of Federal coal lands. In connection with mining this Federal

coal, Signal Peak would also mine adjacent private and State coal. Mining would continue approximately 11.5 years and 109.7 million saleable tons of coal would be recovered. In addition to the mining of adjacent private and State coal, other actions that would be conducted in association with the proposed mining plan modification (i.e., connected actions) include facilities associated with rock disposal; construction of roads, boreholes and powerlines; installation of ventilation facilities; and other surface disturbances.

Interested persons may view the EA and the unsigned FONSI on the OSMRE website at:
