

Prepared/Revised: December, 2016

# OSMRE Internal Installation Instructions ArcGIS Desktop 10.4.1

## **OSMRE Internal Users: Administrative privileges** <u>not</u> required.

Before installing this software, check to make sure that the **KeyServer Client software** is installed on the target computer.

You can check by going to **Start > All Programs > Sassafras K2**. Then select '**KeyVerify**.' The resulting screen should indicate a server under '**Name**'. It should also list "**Valid**" under Status. (It may take a moment for the screen to appear.)

If there is no Sassafras K2 folder under All Programs, or the KeyVerify does not indicate a valid install, go to the TIPS website <u>https://www.tips.osmre.gov/</u> under **Software – Downloadable Software** and download the K2Client software appropriate to the target computer (32-bit or 64-bit). Follow the installation instructions included on the Downloadable Software page to install the KeyServer K2Client software.

### If the Sassafras K2 client is not resident – then the ArcGIS software must not be installed.

Name:	westls.osmre.gov K5T44GQL5GH2C4P-1122	
Protocol:	TCP/IP	
Туре:	Server	
KeyVerify L Started:	icense Information 10:35 AM	
Status:	Valid	
Type:	Network	

### Verify that your computer meets these system requirements:

ArcGIS for Desktop requires Microsoft .NET Framework Version 4.5. If .NET Framework 4.5 is not detected on your machine, the ArcGIS for Desktop setup will not proceed.

Ownersting Systems 1		Minimum OS	Maximum OS	
Operating Systems *		Version	Version	
Windows 10 Home, Pro, and Enterpri	ise (32 bit and 64 bit [EM64T])			
Vindows 8.1 Basic, Pro, and Enterprise (32 bit and 64 bit [EM64T])		Update: April 2014		
Windows 8 Basic, Pro, and Enterprise	(32 bit and 64 bit [EM64T])			
Windows 7 Ultimate, Professional, an	d Enterprise (32 bit and 64 bit [EM64T])	SP1		
Windows Server 2012 R2 Standard and Datacenter (64 bit [EM64T])		Update: April 2014		
Windows Server 2012 Standard and	Datacenter (64 bit [EM64T])			
Windows Server 2008 R2 Standard, Enterprise, and Datacenter (64 bit [EM64T])		SP1		
Windows Server 2008 Standard, Enterprise, and Datacenter (32 bit and 64 bit [EM64T])		SP2	SP2	
	Supported and Recommended			
CPU speed	2.2 GHz minimum; Hyper-threading (H	ling (HHT) or Multi-core recommended		
Platform	x86 or x64 with SSE2 extensions			
Memory/RAM	2 GB minimum			
Display properties	24-bit color depth			
Screen resolution	1024x768 recommended minimum at normal size (96 dpi)			
Swap space	Determined by the operating system; 5	500 MB minimum		
	2.8 GB			
Disk space	In addition, up to 50 MB of disk space may be needed by the Windows System directory (typically, C:\Windows\System32). You can view the disk space requirement for each of the 10.4.1 components in the Setup program.			
	If using ArcGlobe, additional disk space may be required. ArcGlobe will create cache files when used.			
	64 MB RAM minimum; 256 MB RAM or higher recommended. NVIDIA, ATI, and Intel chipsets supported.			
	24-bit capable graphics accelerator			
Video/Graphics adapter	OpenGL version 2.0 runtime minimum is required, and Shader Model 3.0 or higher is recommended.			
	Be sure to use the latest available drivers.			
Networking hardware	Simple TCP/IP, Network Card, or Micros license manager.	icrosoft Loopback Adapter is required for the		

- 1. Administrative rights are not required -- the installation of ArcGIS Desktop 10.4.1 is done remotely.
- 2. Click Start > All Programs > Microsoft System Center 2012 > Configuration Manager > Software Center.
- 3. At the Software Center dialog with the **Available Software tab** highlighted **click** on the **ArcGIS 10.4.1 for Desktop.**
- 4. **Click INSTALL** at the lower-left of the page.
- 5. The installation will complete automatically.

## It is recommended to reboot the computer.

#### End of instructions
